

## **Re-vamping the outside area at Filleigh Primary School**

Having now repaired the fence and crumbling wall, the seating area and lower garden are again accessible. However, it has become very overgrown after being left for 6 months.

The PTA and Mr Carroll met yesterday to discuss what we would like to see there and how the school planned to use these areas.

Some people of a certain age may remember 'Ground Force' where volunteers pulled together to help rejuvenate a garden. We hope to do something similar.

Ideally we are looking for offers of skills or services which would help us concrete area and help with raised beds through either donations of supplies and time or competitively priced services.

Our wish list:-

Hardcore and Concrete – supplies and / or skills to lay it.  
Sleepers for levelling beds  
Decking boards

If you could help in this planning stage, please let Emily Witherow – Chair of PTA know. Once we have an idea of whom and what is available we can firm up the plans.

We aim to further develop other areas later on, so the children have an undercover working area for Forest Schools. More information will follow next year.
